WORK EXPERIENCE

Software Development Engineer Intern Jan 2026 - Jun 2026

LexoLegal *Remote*

- Architected async **REST APIs** in **FastAPI**, **SQLAlchemy 2.0**, and **PostgreSQL** (SQL) behind an **Nginx** proxy on **Linux**, containerized with **Docker** and automated **Git** CI/CD pipelines.
- Built and deployed 'Munshi', an autonomous assistant in **Pydantic AI** and **FastAPI**, resolving multi-turn financial and legal queries with **sub-2s latency** via tool-calling loops.
- Prevented race conditions from rapid concurrent requests by designing **Celery** workers with atomic **Redis** distributed locks and non-blocking 10s countdown requeues (90-retry ceiling).
- Integrated **Model Context Protocol (MCP)** clients with **Pydantic AI**, isolating verified user identity inside AgentDeps rather than LLM tool parameters to eliminate prompt injection risks.
- Automated daily document ingestion across 25 High Courts and 743 District Courts via **Celery** and **Bash**, utilizing **Selectolax** DOM extractors and **JSON** payloads for batch **PostgreSQL** inserts.

PROJECTS

ncert-rag-evals | *Python, Jupyter Notebooks, uv, SQLite FTS5, ChromaDB, LlamaIndex, Pytest* GitHub

- Constructed an empirical retrieval benchmark across 17 STEM textbooks in **Python** and **Jupyter Notebooks**, implementing custom hybrid search in **SQLite FTS5** and **ChromaDB** instead of high-level **LlamaIndex** abstractions to profile 8 retrieval strategies on raw CPU latency.
- Proved that fusing BM25 with dense embeddings via Reciprocal Rank Fusion (RRF) achieved **86.9% Recall@5 in 8.9ms on CPU**, matching LLM query expansion while cutting latency by **99.8%**.
- Engineered a document parser indexing 4,429 section-aware chunks into **SQLite FTS5** and **ChromaDB**; validated statistical significance via paired McNemar tests (**p = 0.0021**) across 92 unit tests in **Pytest**.

doubtless | *Pydantic AI, FastAPI, Multimodal RAG, Groq Whisper, Celery, Redis, Logfire* GitHub

- Designed an asynchronous 4-stage media ingestion pipeline (PipelineRunner) in **Celery** and **Redis** that transcodes HLS streams, slices 16kHz mono audio (<15MB/hr), and transcribes lectures in <10s via **Groq Whisper**.
- Streamlined real-time solutions for STEM queries by developing an interactive assistant in **Pydantic AI** and **FastAPI**, streaming solutions with live context via SSE.
- Instrumented distributed tracing across agent runs via **OpenTelemetry** and **Logfire**; built the async data layer with thread-safe **SQLite WAL** repositories and **Redis** to serve concurrent queries (151 tests).

vectorless-rag | *Python, Jupyter Notebooks, Matplotlib, Pydantic AI, Ollama, ChromaDB, PyMuPDF* GitHub

- Evaluated dense vector search against LLM-based page indexing on benchmark documents using **Pydantic AI**, configuring **Ollama** as a local testbed alongside cloud LLMs across 18 benchmark queries.
- Benchmarked retrieval trade-offs in **Jupyter Notebooks** using **Matplotlib**: analyzed query failure cases and plotted the **2.7x token cost** and **2x latency** tradeoff (while verifying **100% retrieval hit rate** and **0.85 citation precision**).
- Created a zero-framework document ingestion engine in **Python** using **PyMuPDF** and **ChromaDB**, streaming page-aligned document windows with bounded memory (**<200MB**) to eliminate context boundary truncation and cut extraction latency by **40%**.

TECHNICAL SKILLS

Languages & Core: Python, SQL, Bash, JSON, Linux

Backend & Data Pipelines: FastAPI, Celery, Redis, PostgreSQL, SQLite, Nginx, Docker, REST APIs

AI & Vector Retrieval: Pydantic AI, Model Context Protocol (MCP), ChromaDB, Ollama, LlamaIndex

Testing, Observability & Tools: Pytest, Git, OpenTelemetry, Logfire, Jupyter Notebooks, Matplotlib, PyMuPDF, Selectolax

LEADERSHIP & ACTIVITIES

- Delivered 3 technical sessions as a speaker on 'Generative AI Unlocked: LLM Basics' and modern AI developer tools, training 150+ students on autonomous agents and retrieval architectures.
- Coordinated placement drives and corporate outreach at CTPC (Central Training & Placement Cell), managing scheduling and operational logistics for 100+ candidates across tech recruiters.

EDUCATION

Veer Bahadur Singh Purvanchal University 2023 - 2027

Bachelor of Technology in Computer Science & Engineering *Jaunpur, India*
