WORK EXPERIENCE

Software Engineer Intern Nov 2025 - July 2026

LexoLegal *Remote*

- Architected a cross-platform legal case tracking application (Android/iOS) using **Kotlin Multiplatform (KMP)**, **Compose Multiplatform**, and **Koin**, sharing **85%+ core logic** with **Room KMP** for offline-first data sync.
- Engineered an automated case-tracking and push-notification alert pipeline integrating **FastAPI** and **Celery** sweep workers with **Firebase Cloud Messaging**, delivering daily cause-list updates directly to client devices.
- Built an automated conversational legal assistant utilizing **Pydantic AI** and Meta Cloud API webhooks with HMAC-SHA256 verification, processing user case status inquiries with **sub-2s response latency**.

Freelance Developer Oct 2024 - Jan 2025

Webxela *Remote*

- Shipped Coupit, a cross-platform POS loyalty app using **Compose Multiplatform (CMP)** and **Spring Boot**, engineering a custom physics-driven Canvas spin wheel and dynamic **Apple Wallet** pass generation via **PassKit**.
- Implemented Square POS **OAuth 2.0** authentication and webhook ingestion pipelines in **Spring Boot** and **Spring Data JPA**, automating merchant onboarding in **under 2 minutes** with idempotent transaction verification.
- Developed a concurrent trademark search and scraping engine in **Kotlin**, **Spring Boot**, and **PostgreSQL**, leveraging **Coroutines** with custom dispatchers, rate-limited HTTP connections, and indexed **trigram search** queries.

PROJECTS

WatchTower | *Kotlin, Jetpack Compose, WorkManager, Coroutines* GitHub

- Developed a local-first Android web monitoring app utilizing MD5 checksum hashing and **Myers diff algorithm** to track DOM modifications and dispatch real-time push alerts.
- Optimized concurrent network inspection via **Kotlin Coroutines** with semaphore rate limiting, executing background crawls via **WorkManager** while maintaining a consistent **60 FPS UI frame rate**.

Modflix | *Kotlin, Jetpack Compose, Ktor, Koin, KSoup* GitHub

- Architected a multi-module streaming application in **Jetpack Compose**, isolating network scraping into an independent media-parsing library module (**:cassini**) with clean unit testing.
- Engineered an asynchronous web scraper with **KSoup** and **Ktor**, implementing dynamic domain mirror resolution across **8+ streaming providers** with resilient link extraction and IMDb metadata enrichment.

Oak | *Kotlin Multiplatform (KMP), Compose Multiplatform, Ktor, Koin* GitHub

- Authored an open-source **Kotlin Multiplatform** library targeting Android, iOS, and JVM to extract and normalize catalog and pricing data across **5+ major e-commerce platforms**.
- Structured **Clean Architecture** with platform-agnostic domain use cases, multi-engine **Ktor** HTTP client abstractions, and custom **Gradle convention plugins** for automated publication.

Cypher-X | *Kotlin, Jetpack Compose, AndroidKeyStore, Biometrics, Room* GitHub

- Built an offline-first encrypted password manager utilizing hardware-backed **AndroidKeyStore** and **AES-256-GCM** authenticated encryption with cryptographically random initialization vectors.
- Implemented biometric authentication gates using **AndroidX BiometricPrompt** and **MVI** unidirectional data flow to secure local **Room** database persistence against unauthorized access.

TECHNICAL SKILLS

Languages & Core: Kotlin, Python, SQL, DSA, OOP, DBMS, Operating Systems

Mobile & Multiplatform: Android SDK, Jetpack Compose, Kotlin Multiplatform (KMP), Compose Multiplatform (CMP), Retrofit, Room, SQLite, WorkManager, Jetpack Navigation

Backend & Cloud: Spring Boot, Spring Data JPA, Spring Security, Ktor, FastAPI, Celery, Redis, PostgreSQL, REST APIs, WebSockets, Firebase

Architecture & Async: Clean Architecture, MVI, MVVM, Multi-Module Architecture, Kotlin Coroutines, Flow, StateFlow, Multithreading, Dependency Injection, Hilt, Koin

Testing & Tooling: JUnit 5, MockK, Kotest, Gradle (Kotlin DSL), Git, GitHub Actions, Docker, Android Studio, Postman

LEADERSHIP & ACTIVITIES

- Delivered 3 technical sessions as a speaker on 'Generative AI Unlocked: LLM Basics' and 'Level Up Your Career with AI', training 150+ college students on foundational LLM concepts, prompt engineering, and modern AI developer tools.
- Coordinated placement drives and corporate outreach as Student Coordinator at CTPC (Central Training & Placement Cell), managing logistics and interview scheduling for recruiters and 100+ candidates.
- Organized Smart India Hackathon internal rounds across 2 editions; coordinated problem statement curation, mentoring, and judging logistics for 20+ teams and 120+ participants.

EDUCATION

Veer Bahadur Singh Purvanchal University 2023 - 2027

Bachelor of Technology in Computer Science & Engineering *Jaunpur, India*
